M-audio oxygen 49 mk4 usb midi keyboard controller

Image not available forColor: To view this video download Flash Player Melodics Offer For a Limited time join over 100,000 musicians building their skills with Melodics. Melodics is a desktop app that teaches you to play and perform with MIDI keyboards, pad controllers, and drums. Whether your just starting out or a seasoned pro looking to learn advanced techniques Melodics grows with you. It's free to download upon registration of your controller, and comes with over 60 free lessons (including Five Exclusive to M-Audio) to get you started! NEW: Welcome to The World of VIP Music Software | Effortless Integration, Enhanced Workflow Experience expanded control of your VST instrument and effect collection with Oxygen 49 and VIP3.0 (Free Download Included a \$99.99 Value). VIP3.0 provides you with unparalleled access to your virtual instrument and effect collection, seamlessly integrating the hardware / software experience and grants the unrestricted freedom to create in a user-friendly, intuitive format. The combination of VIP and Oxygen 49 maximizes workflow and ensures a playing experience that feels natural and enhances creativity - the natural, tactile feel of hardware fused with the unrivaled processing capability of virtual Instruments. Quickly find sounds based on instrument type, timbre, style or articulation from your entire VST library; sculpt immersive, expressive sounds and textures layering up to 8 separate instruments and patches per VIP instance; load up to 4 different VST effects per instrument channel to sculpt the perfect sound; put power into your performance with Pad Chord Progressions and user-friendly Key Control processors; and much more. From live performance to studio production, VIP's user-friendly functionality coupled with a diverse feature set guarantees simple, seamless integration into your existing setup and provides the ultimate platform for unrestricted creative expression. The Oxygen Series M-Audio pioneered the portable MIDI controller market with the Oxygen series of keyboard controllers. Today, M-Audio continues to be a leader of this technology by developing intuitive controllers for software-based music production and performance. Thanks to continued innovation over the course of nearly a decade, the new Oxygen series controllers offer more control, deep hardware/software integration, and come equipped with a reliable build that enables you to make music on the go or implement these controllers into any studio. Streamlined Control With an array of assignable knobs, pads, and faders, Oxygen 49 gives you total control over your software, allowing you to stay engaged in the creative flow of recording and mixing music without ever reaching for the mouse. It features 49 velocity-sensitive keys for playing chords, bass lines, and melodies; eight assignable knobs for tweaking effect plugins and virtual instruments; eight velocity-sensitive pads for triggering samples or finger drumming; and nine assignable faders for mixing tracks together and controlling the master output. Oxygen 49 also has dedicated transport controls and track-up and -down buttons that allow you to initiate play, stop, and record in the DAW environment right from your keyboard controller. Use Your Favorite DAW The Oxygen 49 MIDI controller offers out-of-the-box integration with popular DAWs including Ableton Live, Pro Tools, Logic, Cubase, and many more. Using DirectLink, Oxygen 49's controls instantly map to key parameters in your favorite DAW, enabling you to immediately tweak the mixers, editors, and transport windows. Additionally, Oxygen 49 has built-in customizable mapping presets that quickly interface Oxygen 49 with your favorite effect plugins and virtual instruments. Setting up a MIDI controller with your software doesn't get any easier than this. For an easy-to-use and portable setup, all Oxygen controllers are USB-powered, class-compliant, and support USB-MIDI connectivity. Plus, they support iOS connectivity with the Apple iPad Camera Connection Kit (sold separately), enabling you to perform and compose with audio apps on your iPad and other iOS devices. Ableton Live Lite Ableton Live Lite is included with Oxygen 49 for immediate music creation. One of the most popular performance and production programs available in the world, Ableton Live Lite is a powerful music creation tool that enables musicians and producers to spontaneously compose, record, remix, improvise, and edit musical ideas in a fluid audio/MIDI environment. Host plugins and use Oxygen 49 to produce, compose, or perform all within Ableton Live Lite. When you are satisfied with your work, Ableton Live lets you save it or mix it down. SONiVOX TWIST SONiVOX Twist is a spectral morphing synthesis virtual instrument. Comprised of a dynamic interface, an advanced pattern generator, and onboard effects, Twist lets you create serious sounds using simple controls. Two swirling sound layers provide unique harmonic controls and form the basis of every patch. Sculpt your sound with a multi-mode filter, independent amp and filter envelope generators, and a LFO that can be sync'd to tempo. AIR Music Tech Xpand!2 Xpand!2 is a multitimbral workstation offering four active sound slots, or parts, per patch. Each part is provided with its own MIDI channel, Note Range (Zone), Mix, Arpeggiation, Modulation, and Effects settings—an excellent method for creating individual parts. Harnessing the four parts together to build one amazing Patch is where Xpand!2 reveals its true power. Using everything from wavetables and FM synthesis to sample playback, the expert sound design team at Air Music Tech has carefully created thousands of ready-to-play Xpand!2 patches. Touch Loops Chop up and mix 2 gigs of samples ranging from deep ambient synth pad loops to vintage drum one shots. These are all designed to inspire your music production and provide professional sounding samples that will shine in your mix. Touch Loops perfectly captures the tone and intensity of each sample, so they enhance and complement any song, wherever you use them. This incredible value can be found in your M-Audio account, ready to be downloaded and chopped to your liking! Ableton is a trademark of Ableton AG. Cubase is a registered trademark of Steinberg Media Technologies AG. Pro Tools is a registered trademark of Avid Technology, Inc. in the U.S. and other countries. Logic is a trademark of Apple Inc., registered in the U.S. and other countries. M-Audio is a trademark of inMusic Brands Inc., registered in the US and other countries. inMusic is the exclusive distributor of SONiVOX. All other product or company names are trademarks or registered trademarks of their respective owners. Welcome to the brand-new Oxygen Series from M-Audio, the Oxygen Series (MKV). In today's world of music production, controlling your digital music environment is important. It is not only how the pros improve their workflow, but also how they create unique cutting-edge signature sounds. M-Audio has updated the most iconic series of MIDI keyboard controllers on the market for software-based music production and performance. The new Oxygen Series (MKV) keyboard controllers offer innovative advancements in hardware control enabling you to create modern cutting-edge music on stage or in the studio. Professional Producer Features The Oxygen 49 (MKV) controller includes powerful features essential for creating and producing music such as Note Repeat (a staple mark in beat production), Full Velocity Control of keys and 8 pads, 8 assignable knobs for controlling effect plugins and virtual instruments, and 9 assignable faders for mixing; all opening a world of precise music creation techniques making your signature sound professional and modern. Note Repeat allows you to hold down any of the 8 custom-made M-Audio velocity-sensitive performance pads in 2 available pad banks to hear a repeated rhythmic pattern at a selectable note division. The Note Repeat feature can be activated momentarily or can be used in Latch mode. If you choose Momentary, holding the Note Repeat button will make the note played by the pad automatically repeat. If you choose Latch, pressing any pad will cause its assigned note to repeat without having to hold down the Note Repeat button. Built-in Arpeggiator Arpeggiators help add excitement and movement to music quickly and easily. The built-in Arpeggiator on the Oxygen 49 (MKV) with Type, Octave, Gate and Swing controls will creatively affect anything you are playing on the keys from any virtual instrument in your DAW. When the Arpeggiator is activated, the keyboard will repeatedly play the keys that are pressed in the selected sequence. The arpeggiator's timing and rhythm is based on the keyboard's time division setting in either the keyboard's tempo, or your DAW's tempo setting. Each note in the arpeggio will be the length selected for the time division setting. For example, if you select 1/4, each note in the arpeggio will be audible in quarter note increments. This powerful tool can operate in Latch or Momentary mode, making it easy to unleash your creativity. Smart Controls Smart Chord and Smart Scale technology are the bridges between your musically creative mind and your final productions. The Smart Chord feature helps bring out your inner musical genius by playing full chords with a single key press, and with the Smart Scale feature, the Oxygen 49 (MKV) keys transform into a perfect scale, playing the exact notes within a chosen scale. With Smart Chord and Smart Scale technology, creating music and unleashing your unlimited creativity has never been easier. With Smart Chord activated, pressing a single key will play a full chord rather than just one note. The key you press will determine the root note in the chord. The rest of the chord's properties (Major, Minor, and Voicing) are determined by the settings you choose. Smart Chord also has a Custom Mode which lets you determine the chord structure that will be assigned to each key by manually playing it. For example, if you select Custom Mode, and play a 1-b3-5-b7 chord, every key will then be assigned to play this chord structure. The note of the key you press will serve as the root of the chord and all the parameters can be edited right on your Oxygen keyboard controller. The Oxygen series also features intelligent Smart Scale technology. With Smart Scale, you can set the keybed so that only notes in the selected scale are able to be played. This allows you to play within a chosen scale without the risk of playing any wrong notes. You can choose from over 15 different scale variations when assigning a scale to the keyboard. With Smart Scale controls right on the keys, you will have easy access to set and change Smart Scale parameters on the fly, keeping you focused on what is most important, creating music. Auto-Mapping for Creative DAW Control Using the Oxygen 49 (MKV) controller with any DAW is incredibly easy. The controls such as Transport, Faders, Pan, Record Arm, Solo, Mute, Select and many more, are automatically mapped to most DAWs for a fluid workflow. The Oxygen 49 (MKV) works with all major DAWs—including Ableton, Pro Tools, MPC Beats, Cubase, Logic, Studio One and many more. By simply selecting your DAW on the Oxygen 49 (MKV) keyboard controller and configuring your DAW's preferences to the keyboard, a new world of creative production is at your fingertips. The Oxygen 49 (MKV) keyboard also includes presets for all the virtual instruments and plugins that are included (Mini Grand and Hybrid 3). These world-class plugins can be fully controlled by the Oxygen 49 (MKV) keyboard controller and used in real-time as you create, mix, and bring your music productions to the next level. Premium Software Suite Whatever your production discipline, Oxygen 49 (MKV) includes everything for immediate creative potential from the get-go. Record, sequence, arrange and mixdown your tracks with a choice of two professional DAWs including MPC Beats and Ableton Live Lite. Adding to the arsenal of DAWs are two incredible virtual instrument plugins, the critically acclaimed Hybrid 3 multi-oscillator synthesizer, and Mini Grand—an Acoustic Piano virtual instrument offering a wide array of the most realistic piano tones available on the market. Finally, dive into a world of cutting-edge sound content with a collection of Expansion Packs from Akai Professional's legendary MPC Series - from hard hitting kicks to snares that snap, everything you need to add that professional polish to your production is here.
